

Western States

**Rural Transportation
Technology Implementers**

Forum

June 14-16, 2011
Yreka,
California

What does it take to make Rural ITS work? It takes technical excellence across a variety of skill areas. It takes creativity. It also helps to learn from the experiences of others.

The challenges in making Rural ITS work are significant. Therefore, it's important for ITS technology practitioners to be able to meet in order to share what they've learned and help advance the state-of-the-practice.

If you are involved with ITS technology at a field level, whether in design and engineering, communications system development, systems integration, or field maintenance, we invite you to attend the 2011 Western States Rural Transportation Technology Implementers Forum. *Share what you have learned and learn from others.*

For more information, please contact Leann Koon at the Western Transportation Institute leann.koon@coe.montana.edu • (406) 994-7643 or go to www.westernstatesforum.org.

Support for travel may be available.

Please contact Leann Koon for more information.

The Forum is sponsored by the Western Transportation Institute at Montana State University and the California Department of Transportation through the Western States Rural Transportation Consortium.
